Experience

Jan 2024 - Present

Immersive Technology Lead, CGS Immersive

Serve as lead developer and project manager for production-grade XR training systems used by Fortune 500 clients, owning the full technical lifecycle—from infrastructure design and implementation to cross-functional coordination and final delivery across VR, mobile, and web platforms.

Spearheaded a 33% reduction in XR development time through improved pipeline automation, optimized asset workflows, and enhanced team coordination—while consistently maintaining high customer satisfaction and delivery quality.

Lead all technical stakeholder communications, translating complex XR development strategies into accessible guidance for clients unfamiliar with immersive technologies; serve as primary point of contact for onboarding, planning, and ongoing support.

Collaborated with cross-functional teams to implement custom interaction interfaces and immersive UI components, optimizing both client-specific features and shared infrastructure.

Provided technical leadership through code reviews, mentorship, and architectural guidance, ensuring high code quality, maintainability, and extensibility.

May 2022 - Jan 2024

Senior XR Consultant, Capco

Led cross functional teams in XR experience development, focusing on multiplayer interactions (utilizing Normcore), learning in VR, and data visualizations.

Developed immersive learning experiences and data visualizations within VR, enhancing engagement and data analysis.

Actively coded and contributed as a developer while overseeing project execution.

Maintained clear communication with teams and clients to meet objectives and timelines.

Stayed updated on XR trends, troubleshooting technical challenges, and ensuring quality.

Promoted a culture of learning and provided mentorship for team members
